

Neon to LED • Easy as 1-2-3

Rapid Retrofit

featuring **Venbrite®**

The Easiest, Most Cost Effective Neon to LED Retrofit System EVER!

Rapid Retrofit by Ventex®, featuring our exclusive Venbrite LED system, is the only Neon to LED retrofit process that allows the installer to use the existing GTO wire and conduit, saving hundreds of dollars in labor and material costs.

Venbrite's exclusive design features the sign industry's only series wired LED strings powered by the same constant current power supply technology you have come to know and trust from Ventex. This unique, time tested technology is the simplest, most energy efficient method to illuminate LEDs.

Rapid Retrofit makes converting neon channel letters to bright, energy efficient LEDs as easy as 1-2-3.

1. Remove existing neon tubing & replace with Venbrite LED modules - connect to existing GTO wire.

2. Remove existing neon transformer & replace with Venbrite LED Power Supply - connect to existing GTO wire.

3. Replace sign faces & enjoy the virtually maintenance free illumination of Venbrite LEDs.

The Venbrite LED System is UL Classified for Neon to LED Conversion.

Call, email or log on today to learn about this and many other energy-efficient and cost saving solutions from Ventex Technology.
