

Remote Mount LED Driver

Delivers 175 Foot Remote Mounting

No other LED sign lighting system has the reach of Venbrite. Using standard #18 AWG wire, only Venbrite can drive LED modules located up to 175 feet from the power supply. Our series wired, constant current design provides unsurpassed efficiency, reliability and versatility.

Convenience, cost savings and virtually non-stop performance - Ventex delivers.

- Locate power supplies for easy access
- Use standard #18 AWG wire up to 175 feet
- Make sign service calls faster, safer and easier
- Eliminate costly swing stages, lifts and cranes for service
- Avoid customer inconveniences from blocked entrances during service

All of these outstanding features are available with the UL Classified Rapid Retrofit Neon to LED Conversion System.

Email, call or log on today to learn more about the technologically advanced illumination options from Ventex Technology.
